

A wide-angle photograph of a lush green wetland. In the foreground, tall green grasses with white seed heads stand in a shallow pond. The background shows a line of trees and rolling hills under a clear sky.

WRP - Restore, Protect, and Enhance Wetlands

A photograph of a wetland area with a large body of water. The water is covered with green water lilies. A white egret is standing in the water, surrounded by other birds. The background is a dense line of trees.

WRP - Restore, Protect, and Enhance Wetlands

A photograph of a wetland with a pond. The water is dark and reflects the surrounding green reeds. Two ducks are swimming in the water. The background is a dense wall of tall reeds.

WRP - Restore, Protect, and Enhance Wetlands

A photograph of a wetland with a pond. The water is dark and reflects the surrounding tall grasses. The foreground is dominated by tall, brownish grasses. The background is a dense line of trees.

WRP - Restore, Protect, and Enhance Wetlands

A wide-angle photograph of a lush green wetland, similar to the first image. In the foreground, tall green grasses with white seed heads stand in a shallow pond. The background shows a line of trees and rolling hills under a clear sky.

WRP - Restore, Protect, and Enhance Wetlands

The Wetland Reserve Program (WRP) - provides technical assistance and financial incentives to restore, protect, and enhance wetlands in exchange for retiring marginal land from agriculture. Landowners may be paid an easement payment in exchange for enrolling their land.

Benefits

- Creates quality waterfowl habitat in areas of critical habitat need
- Landowners enjoy the natural values of the areas and profit from recreational activities and lease hunting
- Creates a partnership that provides landowners expertise in the best wetlands restoration
- Improves water quality through natural water filtration and reduces flood risk through flood water storage
- Landowners maintain control of access to the land

Equal opportunity employer and provider.
