

Alabama Watershed Operations Success Story

Camp Branch – Site 8

Camp Branch Site 8 is in Dale County, Alabama (Congressional District 2). This site is part of a PL-566 Small Watersheds Project that was funded through the American Recovery and Reinvestment Act of 2009. This project consisted of the stabilization of a 20 foot deep gully located within 20 feet of a paved county road that not only threatened the road but sediment from the erosion was causing water quality problems downstream.

Construction on the site began in May 27, 2010, and was completed June 21, 2010, at a cost of \$66,628.
